Innovating the HP Way

# ***Introducing Agilent Technologies!!***

Agilent Technologies is a diversified technology company, resulting from Hewlett-Packard Company's plan to strategically realign itself into two full independent companies. With 43,000 employees serving customers in more than 120 countries, Agilent Technologies is a global leader in designing and manufacturing test, measurement and monitoring instruments, systems and solutions, and semiconductor and optical components. The company serves markets that include communications, electronics, life sciences and healthcare.

On March 2, 1999, HP announced its planned realignment into two companies, and on November 1, 1999, HP and Agilent began to conduct business as two separate businesses. Agilent Technologies is currently a subsidiary of Hewlett-Packard Company, but is expected to become a completely independent company by the middle of the year 2000.

***Tuesday, March 14, 2000  
Hilton Hotel, New Orleans***

## ***Agenda***
